Kids That Care Club
Global Health Initiative Student Application

Are you a student looking for meaningful community service projects? We are looking for people who are interested in creating healthcare educational application programs that will be implemented in rural poor villages of Uganda.

Our next global health project will be studying the **prevalence of anemia in the low income country of Uganda**. Your team will research about the alarming increase of anemia that is causing a rise in preterm births, low birth weight babies and infant mortality rates. You will interact with our Uganda team to discover why anemia is such a problem, to create field surveys that will be conducted by our Rose Uganda Fellows and create a solutions based lesson plan that will be implemented in select Ugandan villages. This is an exciting opportunity to experience the realities of global health!

_____

Please fill out the following application to be considered for our global health team:

Student's First & Last Name:: _____

School: _____ Grade: _____

Age: _____ Students under the age of 18 must have parental permission to participate.

I'm interested in participating in one of the following areas: ☐ **Digital/Graphic/Illustration Arts**
